Appendix C
Stakeholder Analysis Tool

1. Identify the key stakeholders.

- Manager or direct supervisor
- Finance department
- Vendors
- Patients and/or families; patient and family advisory committee
- Professional organizations
- Committees
- Organizational leaders
- Interdisciplinary colleagues (e.g. physicians, nutritionists, respiratory therapists, or OT/PT)
- Administrators
- Other units or departments
- Others: ___________________

2. Stakeholder roles and responsibilities.
(The stakeholder roles—which include Responsibility, Consult, Approval, and Inform and their corresponding responsibilities, described here—guide completion of the table.)

<table>
<thead>
<tr>
<th>Responsibility</th>
<th>Consult</th>
</tr>

Appendix C
Stakeholder Analysis Tool

Directions for Use of the Stakeholder Analysis Tool

Purpose
This form is used to identify key stakeholders. Key stakeholders are persons, groups, or departments in the organization that have an interest in, or concern about, your project and/or may assist you in securing resources to implement your action plan. Involve stakeholders early in the process to ensure their buy-in for implementation.

Because stakeholders may change at different steps of the process, we recommend that you review this form as you proceed from step to step in your action plan.

Definition
Stakeholders are “persons or groups that have a vested interest in a clinical [or nonclinical] decision and the evidence that supports that decision” (AHRQ, 2014).

Identify the key stakeholders
Identify the 5–7 key stakeholders who can most affect, or who will be most affected by, the project, actions, objectives, or change and who can influence the success of the translation work. Key stakeholders are individuals or groups who:
- Make decisions about the project
- Approve the project or aspects of the project
- Serve as subject matter experts
- Provide resources such as support, policy changes, resources, and time

Stakeholder analysis
It is helpful to consider which of the four roles each stakeholder may play in your action planning and translation work. The possible roles are:
- Responsibility
- Approval
- Consult
- Inform

Remember that one stakeholder may fill different roles, depending on the action. Completion of the Stakeholder Analysis Tool will help clarify roles and responsibilities. The descriptions of responsibilities for each role provided on the form will be helpful in this process.
